for corrugated sheet roof**

Mounting set for installation rack for corrugated sheet roof

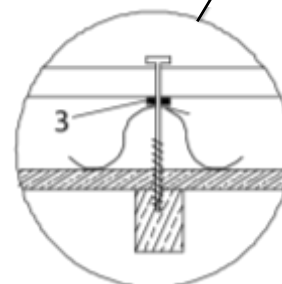

If required, the shaped pipe can also be pre-drilled on-site and fastened at the required location (depending on the wave crest).

ATTENTION!

All bolts and nuts for weight-bearing connections have to be tightened with a calibrated torque handle. The torque table can be found in the „Safety and installation manual for flat plate collectors“.

Pos.	Code	Designation	Per set 03454
1	03933	aluminium profile 40 x 20 x 3 mm	2
